Higher education is facing a unique set of Identity Management challenges – safeguarding new and historic student and faculty information, ensuring regulatory compliance, rolling out institution-wide systems and reporting. Educational institutions have placed tremendous focus on security at every level, but there are numerous hurdles and common deficiencies that must be overcome.

Oracle is pleased to present a "Roadshow" series of events highlighting state-of-the-art identity management implementations specific to the needs of higher education.

Oracle Identity Management Base Build for Higher Education features configurations, enhancements and additions that are specific to the needs of our Higher Education clients. Leveraging Oracle's best-of-breed Identity Management software, you can attain functionality quickly with "Phase I" implementations in nearly half the time of a traditional project.

Join experts Oracle for a lively discussion of the issues and challenges confronting educational institutions, and learn about key strategies, solutions and best practices in the field.
