## Lose the Paper!

Transform Your Business with  
Oracle Universal Content Management

Join Us for a FREE Webcast • Tuesday, Feb. 19

### JOIN US FOR A CONTENT MANAGEMENT WEBCAST

The exploding volume of content in today's business makes it harder than ever to control costs, improve responsiveness, and integrate processes and applications. With a robust content management system, you can automate entire business processes, ensure compliance, and facilitate access to information anywhere inside and outside your organization.

Leverage Oracle's best-of-breed Universal Content Management solutions – encompassing Document and Records Management, Web Content Management, Digital Asset Management, Imaging and Business Process Management, Information Rights Management, and Risk and Compliance – to put paper in its place and transform your business.

Join us for this webcast to learn how to address your content challenges including:

- Providing flexible, robust and scalable content management solutions that integrate with your business financial applications.
- How to collaborate, contribute and access business content anywhere worldwide.
- Maximizing the value of information and intellectual assets across the enterprise.
- Efficient business-wide data management.

Take advantage of this unique opportunity to explore options on how to content-enable critical processes, and manage, secure, and share content services throughout your business.
